

CUSTOM BRITE-LITE SKYLIGHTS

- The **Brite-Lite** skylight has flashing to suit all roof types – Tile, Slate, Corrugated Iron and Metal Deck Roofs.
- Flexible Ducting is a light weight, highly reflective light shaft designed for its ability to be installed where there are obstructions e.g. Structural, Electrical or Plumbing.
- It is also a cost and time saving installation.
- With its ease of installation this product is ideally suited to the home handyman.
- The **Brite-Lite** skylights unique light 'well' gives you all the benefits of a tubular skylight with the added advantage of a square or circular ceiling surround – producing a greater spread of light.
- This is just another reason why **Custom Skylights** are the leaders in skylight technology.

BASE – Base can be made in zinc, galvanised iron or in any of the Colour Bond colours.

DOMES – Dome glazing is clear for maximum light, with only the highest quality acrylics used.

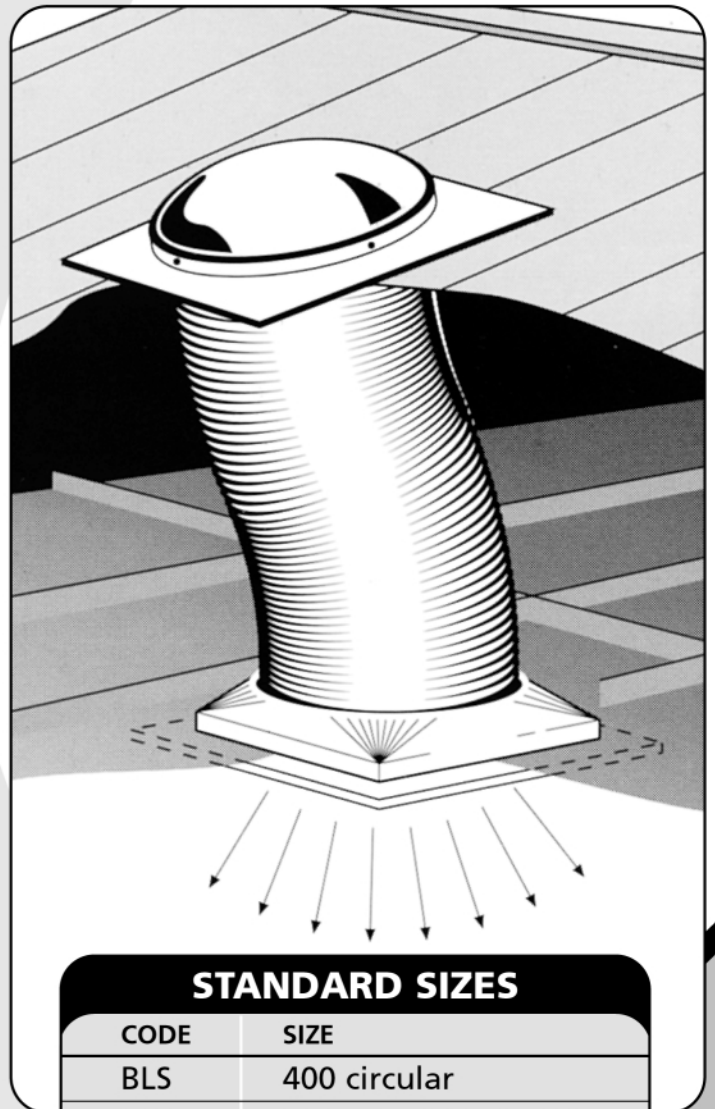

INSTALLATION – Installation can be done by our own installers or can be supplied only.

SHAFT – Shaft is made from polyester film, highly reflective aluminium metal which is UV stabilised.

10 Year Guarantee
