

# CUSTOM HI-FLEX SKYLIGHTS

## SPECIAL FEATURES

- **Hi-Flex** enables you to flex around roof obstructions.
- Quick and easy installation.
- Base available to suit tile, decking and corrugated iron roof.
- Low cost installation.
- With ease of installation, this product is ideally suited to the home handyman.

The **Hi-Flex** skylight is designed to make costly and tedious skylight shaft construction a thing of the past. With **Custom Skylights Hi-Flex Skylight**, installation is both quick and easy. The flexible shaft can flex around roof obstructions such as pipes and beams and adjusts automatically to roof pitches and ceiling heights. The mirror like interior finish reflects far greater light than standard light shafts.

**BASE** – Base can be made in zinc, galvanised iron or in any of the Colour Bond colours.

**DOME** – Dome glazing available in clear, opal or tint with only the highest quality acrylics used.

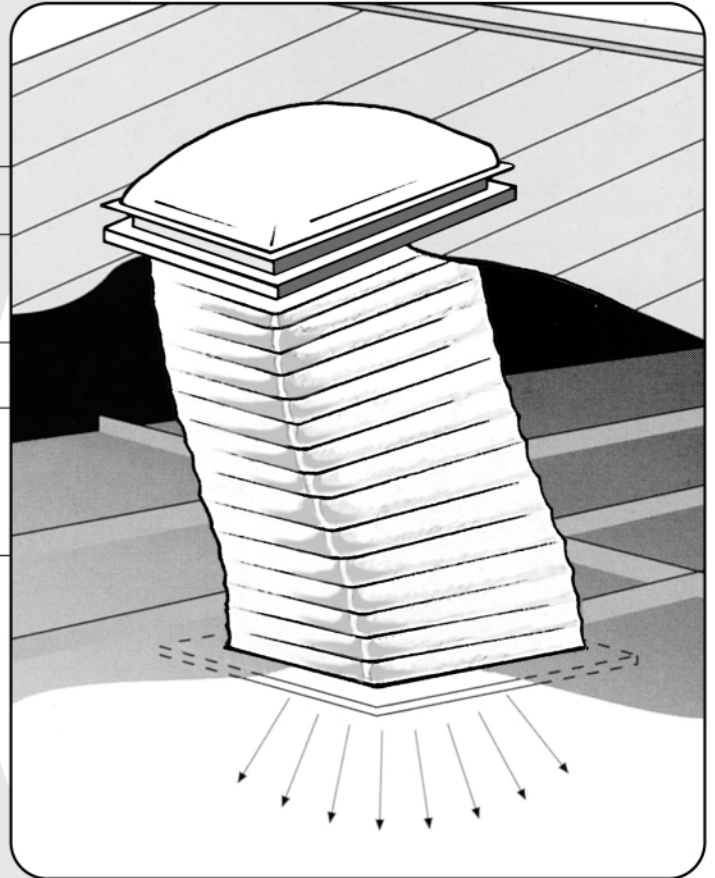

**AUSTRALIAN STANDARDS** – **Custom Skylights** comply with Australian Standards AS4285. Design performance has been verified by a N.A.T.A. accredited testing laboratory.

**SHAFT** – Shaft is made from polyester film, highly reflective aluminium metal which is UV stabilised.

**10 Year Guarantee**
